Skills

- **Languages**: C, C++, JavaScript, PHP, Python
- **Web Technologies**: HTML, CSS, Tailwind CSS
- **Frameworks**: Node.js, React
- **Tools & Platforms**: GitHub, VS Code, MongoDB, MySQL, WordPress
- **Soft Skills**: Problem-Solving, Project Management, Adaptability, Communication, Team Collaboration

Projects

- **Online Land Records and Property Tax Management | Tailwind CSS, PHP, JavaScript |** GitHub — Apr' 25
  - Developed a full-stack web platform for streamlined land record management, enabling users to list properties with detailed metadata and access information through an intuitive, user-friendly interface.
  - Implemented advanced search and filtering features allowing users to quickly retrieve properties based on location, size, ownership, and other key criteria.
  - Integrated a dynamic Property Tax Calculator (in progress) to estimate tax based on custom inputs, improving usability and decision-making for end users.

- **BrainFuel AI Music Streaming Platform | React , Node.js, MongoDB |** GitHub — Mar' 25
  - Built a full-stack, Spotify-style music streaming platform using React.js and Node.js, featuring a sleek, responsive interface for browsing, playing, and managing songs.
  - Integrated the Spotify Web API (using API key) to fetch real-time music data, enabling dynamic search, song previews, mood-based categories, and enriched content discovery.
  - Developed a secure Node.js/Express backend with JWT authentication, playlist management, playback history, and optimized audio streaming to deliver a smooth, immersive user experience.

- **Virtual Try-On System Built with Gemini | Prompt Engineering Project |** Gemini — Aug' 25
  - Created an AI-driven virtual try-on system using Google Gemini, generating realistic outfit overlays through advanced prompt engineering techniques.
  - Designed an interactive try-on workflow where users could upload photos and receive AI-generated results—implemented using a combination of programming logic and advanced prompt engineering.
  - Utilized image-to-image prompting, style control, and multi-step refinement loops to deliver accurate and visually consistent try-on outputs.

Training

- **Centre for Professional Enhancement | Full Stack Development (React & Node.js) |** Certificate — Mar' 24
  - Gained solid foundational expertise in Full Stack Development using React and Node.js, encompassing component-driven UI architecture, server-side logic, and RESTful API development.
  - Completed extensive hands-on projects involving dynamic interface creation, backend routing pipelines, and database operations using MongoDB and Express.js.
  - Strengthened analytical thinking, coding proficiency, and overall technical readiness through structured, mentor-led training and practical problem-solving sessions.

Certificates

- Privacy and Security in Social Media | NPTEL — Nov' 25
- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Udemy — Aug'31
- TCP/IP and Advanced Topics | Coursera — Nov' 24
- Packet Switching Networks and Algorithms | Coursera — Sep' 24
- Peer-to-Peer Protocols and Local Area Networks | Coursera — Sep' 24

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering;), ***CGPA : 6.53*** — *Aug' 23(Present)*
- **Sasi Junior College** — Velivennu, Andhra Pradesh
  Intermediate; ***Percentage: 94%*** — *Apr' 21 - Mar' 23*
- **Sasi High School** — Tadepalligudem, Andhra Pradesh
  Matriculation; ***Percentage: 94.6%*** — *Apr' 20 - Mar' 21*
